

## **Critical perspectives on Evolutionary Biology: sex, sex roles , and maid choice**

Vortrag von Prof. Dr. Malin Ah-King, Universität Stockholm

### **Abstract:**

My interdisciplinary research in Evolutionary Biology and Gender Studies includes problematizing notions of biological sex as binary and stable, questioning the concept of "sex roles", reviewing variability in mate choice and developing a dynamic concept of sex that includes nature's diversity of sex and variable sexualities.

My current project concerns what I call "The Female Turn in Evolutionary Biology" and explores how the international evolutionary research community radically shifted perspectives on the role of females in evolutionary biology. The project aims at understanding the histories, social dynamics and epistemological norms producing this shift in canonical knowledge.

Dienstag, 13. Juni 2017, 15 Uhr c.t., G2-104 (großer Seminarraum, 2.Stock, CeBITec)

### **Weitere Termine**

Translational neuroscience: Genetics, environment and gender aspects in mental disease

Vortrag von Prof. Dr. Dr. Hannelore Ehrenreich, Max-Planck-Institut für Experimentelle Medizin, Göttingen

Mittwoch, 28. Juni 2017, 14 Uhr c.t., W0-135

Vortrag von Prof. Dr. Claudia Hornberg, Gesundheitswissenschaften, Universität Bielefeld,

Vortragstitel folgt

Mittwoch, 5. Juli 2017, 14 Uhr c.t., G2-104
