The Bielefeld studying and teaching model

The Bielefeld studying and teaching model

The Bielefeld studying and teaching model is based on three main principles:

1. The same principal regulations for all Bachelor and Master degree programmes.
2. Generally one examination per module.
3. The Elective Module.

Furthermore, there are no limits on repeating examinations. Instead, there are no minimum or maximum limits for the number of examinations, and students have the freedom to choose the number and type of examinations they wish to take. The Elective Module allows students to develop their own individual profile. Bachelor degree programmes assign 30 credit points, compensating for incapacities, combining studying and work, and internationally oriented studies.

The Elective Module

The Elective Module allows students to choose the number of examinations they wish to take. In addition, students can choose the number and type of examinations they wish to take. The Elective Module allows students to develop their own individual profile. Bachelor degree programmes assign 30 credit points, compensating for incapacities, combining studying and work, and internationally oriented studies.
