Company visits at STOCKMEIER Chemie GmbH & Co. KG and Dr. Kurt Wolff GmbH & Co. KG

Very recently on June 11 and 12, 2018, two exciting excursions to the chemical companies STOCKMEIER Chemie GmbH & Co. KG and Dr. Kurt Wolff GmbH & Co. KG, both being located here in Bielefeld, gave us an insight into the industrial world of chemistry and the challenges related to the commercialization of chemical products and consumer goods, respectively. It was impressive to see the complexity of tasks being needed to develop and implement such novel products successfully to the market. Furthermore, interesting information about the "daily life of chemists" in an industrial environment was provided to the members of our research group and participating chemistry students, respectively. We are very grateful for having had these company visits and thank both companies, STOCKMEIER Chemie GmbH & Co. KG and Dr. Kurt Wolff GmbH & Co. KG, very much for these unique opportunities as well as for their kind hospitality.

The photo was taken within our excursion to Dr. Kurt Wolff GmbH & Co. KG in front of one of the buildings of the Dr. Kurt Wolff-Institut.
