Tuesday, March, 5\textsuperscript{th} 2013

\textbf{19.00} Reception at ZiF

Opportunity to hang posters

Wednesday, March, 6\textsuperscript{th}, 2013

\textbf{9.00} Introduction

\textbf{9.15} Ben Tatler: From eye cups to tea cups: a brief history of eye tracking

\textbf{10.00} John Franchak: Head-mounted eye tracking in infants, children, and adults

\textbf{10.45} Coffee

\textbf{11.15} Chen Yu: The dynamic coupling of hands and eyes: A dual eye tracking of visual attention in parent-child interactions

\textbf{12.00} Lunch at ZiF

\textbf{13.30} Postersession, including presentations of commercial suppliers

\textbf{16.00} Jeff Pelz: Studying oculomotor behavior in natural tasks: Instrumentation and analysis tools for mobile observers

\textbf{16.45} Coffee

\textbf{17.15} Erich Schneider: Examination of Eye Movements and Natural Visual Exploration: Taking EyeSeeCam from Bench to Bedside and into the Field

\textbf{18.30} Dinner (in town, self-paid)

Thursday, March, 7\textsuperscript{th}, 2013

\textbf{9.15} Tom Foulsham: Eye movements in scene perception: from the lab to the real world

\textbf{10.00} Richard Dewhurst: The effect of task difficulty on eye movement sequences in multiple dimensions

\textbf{10.45} Coffee

\textbf{11.15} Rebecca Förster: Scanpath similarity in real-world tasks: A sub-action sequenced linear distance method

\textbf{12.00} Lunch at ZiF

\textbf{14.00} John Findlay: Scanpaths: What determines where the eyes look next?

\textbf{14.45} Titus von der Malsburg: A new method for analyzing scanpaths

\textbf{15.30} Coffee

\textbf{16.00} Rene Gilster: Overt and covert attention during grasping of objects

\textbf{16.45} Mark Greenlee: Neural correlates of fixation, saccadic and pursuit eye movements

\textbf{17.30} General Discussion, Concluding Remarks

\textbf{18.30} Dinner, social at ZiF
