The Collaborative Research Center, CRC-TR211, has an immediate opening for a research position in Theoretical Physics (E 13 TV-L) (non-permanent position)

Your Tasks

The theory division of the physics department at Bielefeld University has an immediate opening for a postdoc position within the newly founded Collaborative Research Center CRC-TR 211 "Matter under extreme Conditions" of University groups in Bielefeld, Darmstadt and Frankfurt a.M.. The position is funded by the German Research Foundation (DFG). Successful applicants are expected to contribute to Lattice QCD calculations in a research project on "Transport properties". The position is initially funded for two years.

Successful candidates are expected to:
- contribute to research on QCD at high temperatures, in particular on the determination of spectral functions and transport coefficients from improved correlation functions, using numerical simulations of the lattice regularized theory (ca. 75 %)
- participate in the joint research work performed in collaboration with groups in Darmstadt and Frankfurt (ca. 15 %)
- contribute to combined research of the whole CRC, including attendance and preparation of common activities as e.g. the yearly "retreat" or the "topical workshops" (ca. 5 %)
- participate in the organization of the academic life in the Physics department (ca. 5 %)

We are looking for scientists who are motivated to actively contribute to the goals of Collaborative Research Center in cooperation with its members in Bielefeld as well as the other two nodes of Darmstadt and Frankfurt.

Your Profile

We expect
- a degree (master or equivalent) in physics
- PhD with a thesis subject close to the research fields of the CRC-TR
- very good knowledge in particle or nuclear physics
- interest in numerical work
- general interest in the research spectrum of the CRC, in particular in relativistic heavy ion physics
- team work and communication capabilities
- good knowledge of English

Preferable qualifications
- knowledge in perturbative QCD

Our Offer

Salary will be paid according to Remuneration level 13 of the Wage Agreement for Public Service in the Federal States (TV-L). As stipulated in § 2 (1) paragraph 1 of the WissZeitVG (fixed-term employment), the contract will be initially for two years. In accordance with the provisions of the WissZeitVG and the Agreement on Satisfactory Conditions of Employment, the length of contract may differ in individual cases. The employment is designed to encourage further academic qualification. In principle, these full-time positions may be changed into part-time positions, as long as this does not conflict with official needs. Bielefeld University is particularly committed to the career development of its employees. It offers attractive internal and external training and further training programmes. Employees have the opportunity to use a work–family balance for all its employees.

Application Procedure

For full consideration, your application and three recommendation letters should be send via either post or email to gudrun@physik.uni-bielefeld.de by the 1st of September 2017. Please mark your application with the identification code: wiss17140. Please do not use application portfolios and send only photocopies of original documents because all application materials will be destroyed at the end of the selection procedure. Further information on Bielefeld University can be found on our homepage at www.uni-bielefeld.de.

Bielefeld University has received a number of awards for its achievements in the provision of equal opportunity and has been recognized as a family friendly university. The University welcome applications from women. This is particularly true with regard both to academic and technical posts as well as positions in Information Technology and Trades and Craft. Applications are handled according to the provisions of the state equal opportunity statutes. Applications from suitably qualified handicapped and severely handicapped persons are explicitly encouraged.
