ZiF Junior Fellowships 2019/20

Are you interested in interdisciplinary exchange?
Would you like to join an international research group?
Does your field of research match our current research topic?
Then apply for a ZiF Junior Fellowship!

The [Center for interdisciplinary Research \(ZiF\)](#) is Bielefeld University's Institute for Advanced Study. Renowned scholars and scientists use it as a home base to work together on innovative interdisciplinary research projects for one academic year.

What

ZiF announces two Junior Fellowships for its Research Group *Cognitive Behaviour of Humans, Animals, and Machines: Situation Model Perspectives* (1 October 2019 – 31 July 2020). This Research Group investigates how perception and memory are connected in the service of the current behavioural demand (task, exploration) in a situation model. The group consists of researchers from Cognitive Neuroscience and Artificial Intelligence. Please look [here](#) for more information.

The Junior Fellows will be an active part of the Research Group. They take part in its meetings and workshops and can bring in their own research.

The fellowships do not imply financial compensation. They provide insight into international research cooperation in practice, an opportunity to expand your own network and the stimulating experience of vivid interdisciplinary exchange in a top-class Research Group.

Who

Doctoral students, postdocs and – in well-founded cases – advanced master students of Bielefeld University are invited to apply, provided that their own research interests are noticeably close to the topic of the Research Group and that they are ready to participate regularly and actively in its weekly meetings and workshops.

How

Please submit your application including a CV and a letter of motivation (in one PDF, via email) by **31 May 2019** to ZiF's Executive Director Prof. Dr Véronique Zanetti:

zif-applications@uni-bielefeld.de

The selection process will involve ZiF's Board of Directors as well as the convenors of the respective Research Group.
