

## Wireless LAN for Guests

Usage of the internet via Wireless LAN for guests at Bielefeld University.

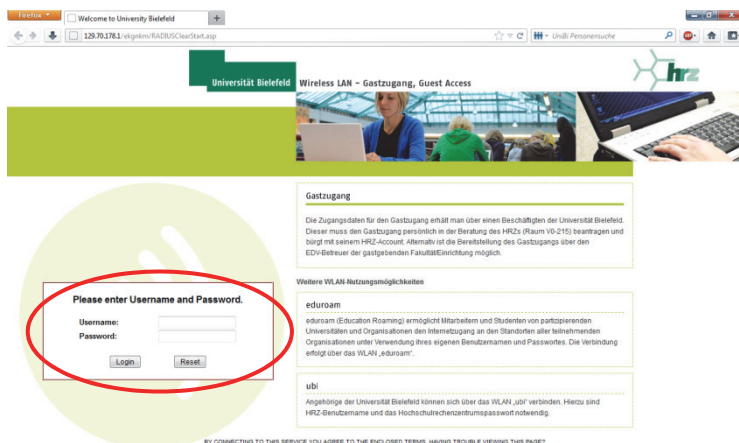

### Getting connected

- > Activate your Wireless LAN card
- > Get connected with the network (SSID) **guest**

If the Wireless LAN *guest* does not appear (e.g. in older versions of Windows or other operating systems) add the following wireless connection:

- > SSID: guest
- > Encryption: none

### Authentication

- > Start your web browser
- > The website to log in will be shown
- > Use your Username and Password to log in
- > If everything went right, you are connected to the internet:

*Verbindung hergestellt /  
Connection established*

### Security

**!!!This guest account is unencrypted!!!**

If you would like to encrypt your data, please use the appropriate procedure (e. g. VPN software while getting connected to your company/university, SSL connections for E-Mail, ...).
