

## Declaration of own work

I hereby declare that I have written this thesis without outside support and that I have created the data sets, drawings, sketches and graphical representations shown, unless otherwise stated, by my own hand. I have not used any sources other than those indicated and have labelled the passages in the work that are taken from other works - including the tables and figures used - in each individual case, indicating the source as a borrowing.

I used the following AI software for the work steps and parts of the thesis:

Name of the Digital or AI Tool	Work steps and functions for which the AI tool was used	Used in the following parts of the paper (page and paragraph references where applicable)	Reflection on the use of the tool and additional information
