

## **Study plan agreement according to module 24-M-SPS(-WIMA)**

**for submission to the Examination Office**

**Supervisor:** \_\_\_\_\_

**Student:** \_\_\_\_\_

**Matriculation No.:** \_\_\_\_\_

### **Notes:**

Access to the Master's module requires the completion of a study plan agreement (SPA) . Students are entitled to be assigned a Master's thesis topic and receive supervision from the supervisor if they have acquired the relevant skills in accordance with the agreed study programme. The SPA describes a study programme lasting a maximum of three semesters in order to be able to write a Master's thesis in a specific area. Modules amounting to 30 CP or specific courses of a corresponding scope are defined for the study programme. When selecting the modules or courses, the supervisor can also suggest various alternatives to the student to a reasonable extent. In order to take the examination in module 24-M-SPS(-WIMA), the student must submit the signed SPA to the examination office of the Faculty of Mathematics.

By concluding this SPA, the undersigned supervisor undertakes to assign a Master's thesis topic that can generally be completed in the specified time using the acquired knowledge and competences, provided that the course of study corresponds to the agreement. This obligation ends three years after conclusion of the SPA. If the supervisor is no longer available to supervise the Master's thesis within these three years for special reasons, the Faculty will provide replacement supervision.

The student can change the area of the Master's thesis, adapt or renew the SPA at any time. To do this, a new SPA must be concluded with a supervisor and submitted to the examination office.

The supervision of a Master's thesis with a topic in the area of the above-mentioned supervisor is possible after completion of the following study programme amounting to 30 CP:

Module abbreviation *)	CP	Course, if applicable, e.g. in semester

\*) List of modules (and module abbreviation):
