

PDF: Generating a schedule

1. Enter the Course Catalog via your MyUni-Account or by creating a guest account.

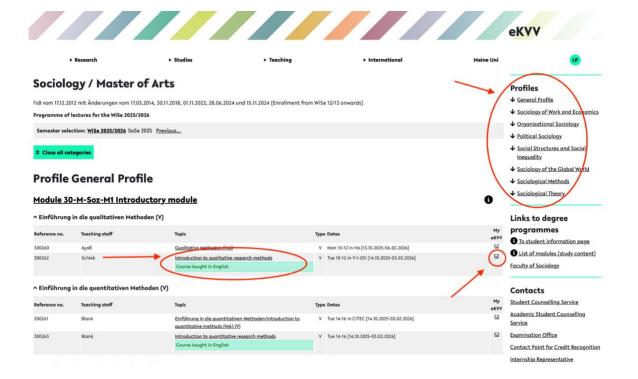

2. Select the letter S to access the classes of the MA Sociology.

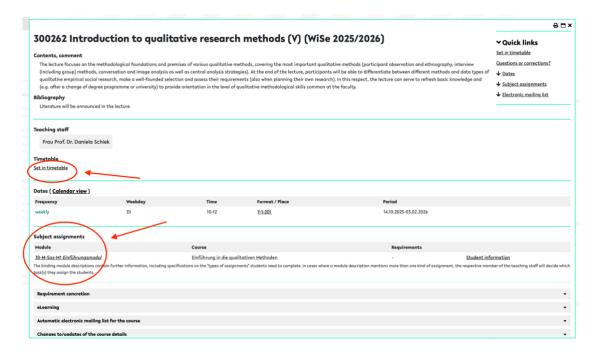

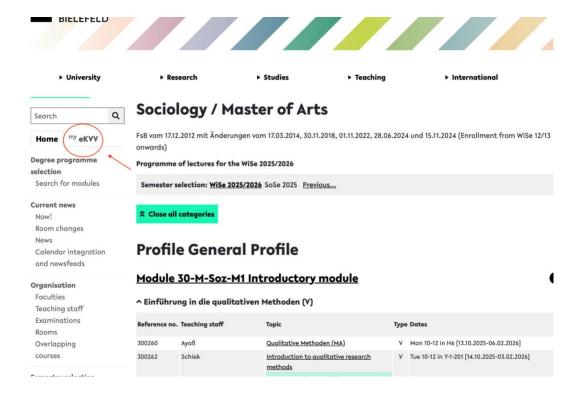

3. Now you should see an overview of the classes listed for the current semester. Classes in English are marked green. On the right it is possible to access classes designated to a specific module.
In case you want to read more information about the class, click the headline, to include a class directly into your schedule, use the little storage item listed below "My ekVV".

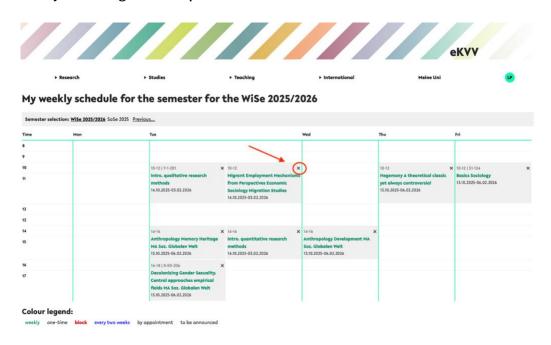

4. The pop-up window that opens when you enter the headline, contains a commentary about the class, as well as details about the lecturer and a **list of modules** this class can be assigned to. Again, here you are able to select this content for your personal schedule by clicking "**Set in timetable**".

5. You are able to see the classes added to your schedule by clicking "my eKVV":

6. In preparation for your new semester, it is normal to select a quantity of classes and decide later on to drop a few. To **delete** a class, click the little **X** and confirm by selecting **Remove|cancel class**.

7. By the third week of the semester, you should only keep classes you are participating in. It is possible to drop out even by the end of the semester, while joining a new one after the first two weeks of the semester is only possible in exceptional cases.
