

Examination Management: How to generate a transcript

+You are able to access your record of collected credits and grades at the university's <u>Examination</u> <u>management</u>.

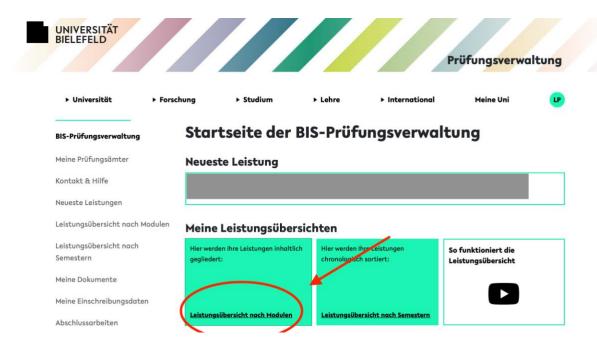

In case you are **missing credits or a grade**, please keep in mind that lecturers in general are required to upload your achievements until **six weeks** after you finished the class or handed in your assignments. If this time has passed it is advised to contact the lecturer and take care of this issue better sooner than later.

1. Open your Service Portal at My Uni and select Examination management:

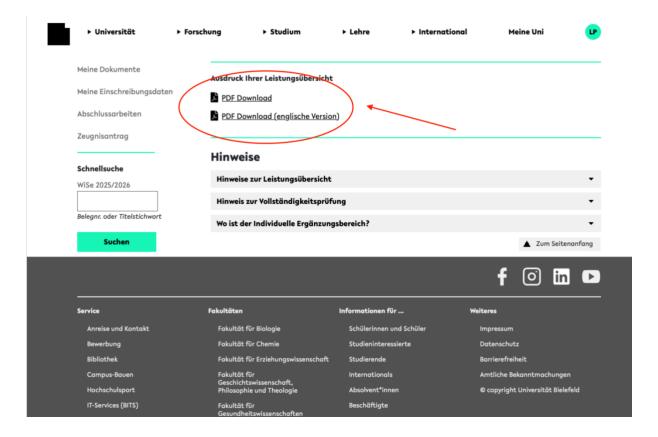

There are **two options** to display your achievements, either (automatically) gathered by modules or in chronological order.

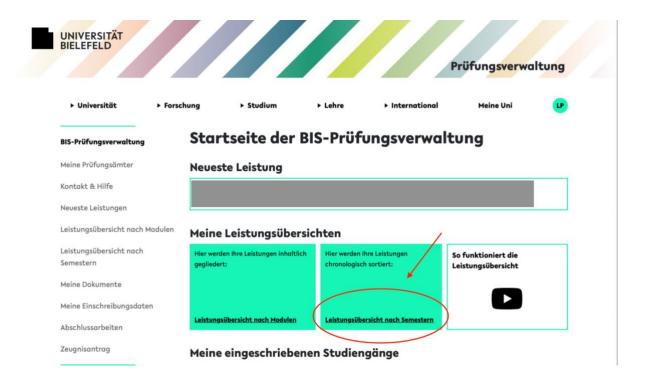

2. To access your achievements gathered by (automatically) assigned modules first click **Leistungsübersicht nach Modulen**:

3. Then **scroll down** to the bottom of the page and select **PDF Download** (here an English version can be generated also):

4. To access your achievements sorted in chronological order first click **Leistungsübersicht nach Semestern**:

5. Here the download button option is located at the page's head:
